Alcohol Detection

Alcotest 6510

- A cost effective handheld breath analyzer with a built in microprocessor & full graphic display. 2 AA cells provide up to 1500 tests and a built in data logger can recall the last 10 measured values.

Dräger

Alcohol Detection

Alcotest 7410

- These proven devices are designed for rapid onsite measurements. The stable electrochemical sensor principle is specific, requires infrequent calibration & is very simple to operate.

Dräger

Alcohol Detection

Alcotest 7110 Mk III

- The Alcotest® 7110 MK III-C is proven evidential breath analyzer. It is the only evidential breath tester on the market whose source code has been reviewed by independent third parties and approved by a Supreme Court decision.
