Spill Containment Systems

Spill Control Funnels

- Gator Polyethylene Spill Control Funnels fit all closed head 30 and 55 gallon drums. Low profile, wide diameter opening offers large "target" for quick, easy pouring. Scalloped, sloping design minimizes splash and prevents containers from resting in their own liquids. Large flat well at the throat of funnel allows for passive draining of paint cans, filters, buckets and other containers. Molded-in hook makes a convenient way to store optional funnel cover.
- Funnel for Flammables includes a drum fill vent with 6" perforated brass flame arrester. Threaded bung cap seals in flammable vapors under normal storage conditions. In high temperatures, pressure relief valve opens to protect drum and prevent explosion. Flame arrester prevents fire flashback. It also offers vacuum relief by allowing hot contents to cool, protecting against drum collapse.
