

Safety Cabinets

- A wide variety of code compliant cabinets are available in sizes ranging from 4 gallons (15 liter) to 120 gallons (454 liter). Smaller cabinets allow solvents to be stored at worksite locations saving costly trips to a central storage room. Undercounter, wall mount and piggyback style cabinets add to safe storage, even when space is at a premium. For high capacity storage, including storage of 55 gallon drums, larger sized cabinets designed specifically to house 30 gallon (114 liter) or 55 gallon (208 liter) drums are available. It's important to note that OSHA Code 29 CFR 1910.106 states that not more than 60 gallons may be Class I and II liquids. Custom sized cabinets are also available for unique requirements.
