

Gomdur®

Fire Hose

"GOMDUR" Nitrile Rubber Fire Hose 4 Layer, Yellow Colour

- 4-layer fire hose, manufactured through progressive extrusion, including a fourth layer of Para-aramide filaments. The hose is particularly suitable for specific uses requiring superior resistance and lightness.
- Specially formulated rubber, extruded through the tubular fabric.
- Minimum load loss thanks to its smooth liner surface.
- High temperature resistance.
- Outer grooving for improved resistance to abrasion and easier handling.
- Jacket manufactured with a tubular weave with high-tenacity polyester thread.
- Good resistance to abrasion and to intensive professional use.
- High resistance to oil, gasoline and a wide range of chemicals.
- Resistant to both contact and radiant heat.
- Lightweight hose, remaining flexible even at low temperatures (-30°C).
- Easy to handle and wind up thanks to its great flexibility.
- High breaking resistance thanks to its special textile construction.
- No maintenance or drying required.
