

ATLAS®

Fire Hose

"ATLAS" Polyester Fire Hose 3 Layer

- Conventional fire hose manufactured with an interior liner and polyester exterior. Top performance hoses that are extremely light and flexible.
- **Liner**
Specially formulated rubber, extruded through the tubular fabric.
Minimum load loss thanks to its smooth liner surface.
High temperature resistance.
Outer grooving for improved resistance to abrasion and easier handling.
Jacket manufactured with a tubular weave with high-tenacity polyester thread.
- **Characteristics**
Good resistance to abrasion and to intensive professional use.
High resistance to oil, gasoline and a wide range of chemicals.
Resistant to both contact and radiant heat.
Lightweight hose, remaining flexible even at low temperatures (-30°C).
Easy to handle and wind up thanks to its great flexibility.
High breaking resistance thanks to its special textile construction.
No maintenance or drying required.
